

Natural Swimming Ponds - Pure Nature

Sarnafil

Guaranteed pleasure

The natural swimming pond is the perfect blend of nature and recreation.

Happiness, simple pleasure, and quiet moments await you here – in the midst of nature. Escape from the hectic routine, bring your family and friends, immerse yourself in the natural source of life – water. Your own natural swimming pond is the perfect place. Naturally with Sarnafil MC.

Sarnafil MC guarantees exceptional longevity. The physiological healthfulness of Sarnafil MC is just as convincing as the safety it provides – an environmentally neutral material you can count on with confidence.

Reliability

You can count on Sarnafil. We have over 40 years of experience with waterproofing membranes. The systems we make and install meet the highest quality and reliability demands of modern construction and civil engineering. Sarnafil systems give you long years of functionality and service because they are based on our own exacting standards. And we stand behind that with our guarantee.

Sarnafil

Ecology is naturally a part

The natural swimming pond is the ideal synthesis of the element water and an enchanting garden world.

Ecology is a growing factor in new construction and renovation projects. We respect this fact at Sarnafil. With our systems, we are careful how we use the earth's finite resources. You can rest assured that Sarnafil MC naturally meets this responsibility.

Sarnafil MC is environmentally compatible, recyclable, and carefully designed to be ecological – from production to application.

Innovation

Innovative strength and the courage to explore new solutions have always been hallmarks of the Sarnafil philosophy. Our motto is progress through innovation. Our engineers and researchers are constantly working on new solutions, new materials, new application systems, new installation techniques, new services. We are ready for change in the market. In fact, we are shaping the market.

Sarnafil

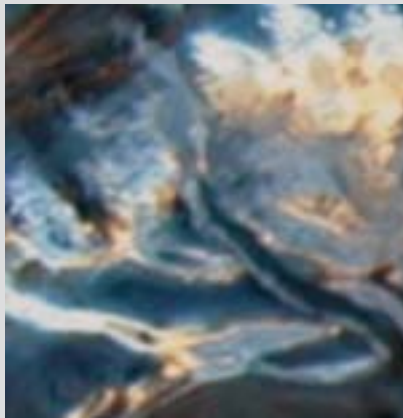

Be close to nature all year round

Natural swimming ponds are pure nature – and not just during swimming season. Forget the sight of an empty pool. You'll love the winter world revolving about your natural swimming pond.

The marvel of nature awaking in spring, the blossoms and play of water in summer, the splashes of autumn colour, the clear reflections of winter – the natural swimming pond is an enticing paradise anytime of year.

With Sarnafil MC, you can enjoy this natural blend of usefulness, beauty, and ecology right in your own garden.

Ecology

Conscious respect of our environment, and shaping our activities to meet the needs of man and nature – these are both part of corporate life at Sarnafil. You can see our commitment to ecology in our actions. Our goals and codes of conduct are clearly defined in our ecology policy. We are committed to preserving resources, managing resources responsibly, reducing environmental stress. And we are committed to developing and applying our systems in unison with nature.

Sarnafil

What we do for you

The system

Sarnafil offers practical, complete system solutions. Every element of the Sarnafil MC system is designed to perfectly match the polymeric waterproofing membrane. Our solutions are versatile in application, and equally well-suited to renovation and new construction.

The services

Our experts are there during every phase of your project, from planning to installation to final approval. Owners, planners, and contractors all count on the knowledge and experience of our skilled specialists.

The product reliability

Sarnafil MC stands up to severe treatment during installation and use, because the mechanical characteristics are outstanding. Puncture resistance is relentlessly high. Yet Sarnafil MC is easy to handle thanks to its unique material composition. That means the installer can work efficiently – saving time and money. Installation is entrusted exclusively to specialised installation partners whose employees are continually trained by Sarnafil. We back up our materials with a 10-year guarantee.

The appearance

Sarnafil MC can meet any aesthetic requirement because the material is flexible in application and comes in a broad range of colours.

Ecological requirements

Sarnafil MC meets stringent requirements of ecological compatibility in manufacturing, installation, and recycling.

Partnership

Partnership is not just a buzzword at Sarnafil. We prove that by always focusing on specific customer-oriented solutions. Our experts design, develop, and produce not just for our customers – but with our customers! And as a service company for designers and installation partners, we offer comprehensive services, including our global network of subsidiaries.

Sarnafil

Make our experience your advantage

Sarnafil offers a broad range of products for the most diverse systems and areas of application. Sarnafil is the expert for difficult waterproofing problems. Our competence is your advantage when it comes to innovation, reliability, ecology, and partnership:

- Flat roofing for new construction and renovation
- Sub-roof membranes for pitched roofs
- Waterproofing systems for civil engineering structures

The Sarnafil Business Areas

Staffed by experienced experts with broad knowledge in the specific areas of application.
